FOR MARITIME SALES SERVICE
& INSTALLATION GLOBALLY

WET MARINE is a subsidiary of a global award winning company in sustainable innovation of water-enhancing technology (WET). Safety and sustainability with a very high level of environmental consciousness throughout the business and product life cycle are core beliefs. WET are recognised by the British government, as a Knowledge Intensive Company (KIC) and is internationally recognised for its research and development. WET has been supported by the UK government via Innovate UK and holds a highly skilled in house team of specialists. WET is extremely proud of it's innovations and hold a long list of awards and accolades that more recently include the addition of the EU Seal of Excellence 2018, the Best Technology Innovation in 2019 and the prestigious Global winner of the best functional water by internationally renowned Zenith. "Elite Sports" champion partners have now been drinking WET's super hydration Great Tasting product, "Pure Ionic Water™" since 2004 . WET MARINE is establishing that "Pure Ionic Water™" is the no.1 environmental choice on all marine vessels.

YachtProjects International Ltd our expert global marine partner. The owner of YachtProjects International and her staff have some 200 years of combined experience in the Commercial and Yachting sectors. Sale, service and installation from bases in UK, USA and Spain is their key speciality. This means they can get your system supplied, installed and commissioned with next to no lead time. They are then well placed to support the operation of your system where ever you are in the world.

You now can help the environment by joining our winning team by, drinking the best water and having no requirement for any more wasteful single use bottled water being on board.

WET MARINE ELITE S WATER SYSTEMS

Pure Ionic Water™ (PIW) is a natural great tasting water with an enrichment of ionic alkaline minerals (not ionised) The WET MARINE ELITE S (meaning SPORTS) WATER SYSTEM produces PIW naturally and permanently enriching the water with for drinking from your ELITE S FAUCET RANGE, which provides 4 choices. THE ELITE PI 7, THE PIW 5, THE PIW 3 and the PIW 1.

The WET MARINE ELITE S WATER system is the No.1 choice for the Marine Industry from yachts less than 40M to the largest Marine vessels. WET Marine can bespoke your choice of drinking water system to suit your vessel. The system will protect the water from the harmful levels of pollutants, heavy metals, chemicals, hormones, (especially Oestrogen) and more importantly MICROPLASTIC. The system then enhances the clean pure water into Pure Ionic Water™ with the enrichment of NATURAL IONIC MINERALS. Providing a functional water, far superior water than any bottled water. WETs unique ionic mineral water won the Global bottled water award for best functional water in November 2019. Drinking the best water from your own faucet. Supports the WSF as it reduces the use of single use plastic bottled water and the transport of heavy glass bottles, hence saving Your marine craft from the heavy weight from storing bottled water.

An environmental win win.

There is a genuine growing research evidence that drinking natural ionic alkaline mineral water will induce various beneficial effects on the human physiology and the processes that mediate health and recovery via superior hydration. That's why our water is also the No.1 choice of elite sports.

Pure water without minerals will not hydrate. Water can contain unhealthy contaminants. The water in bottles is not regulated and the big brands only care about the look and feel of the brand, the water itself is valued far less, fact.

The WSF invites you to support the environment and bottle PIW on your marine vessel with bespoke glass-engraved, re-washable bottles (included with the ELITE PI 7 system) or you could fill up your own branded, recyclable sustainable no plastic 100% recyclable wheat straw cups (separate purchase) that we can organise via the WSF.

PERSONAL BENEFITS

Super hydrating Pure Ionic Water™ with ENRICHED MINERALS make for water that is:

- Great Tasting
- Hydrating
- Detoxifying
- Recovery
- Healthy Water that is produced by a sustainable environmentally friendly process with a huge impact on the reduction of single use plastic and at a practical and affordable cost.

YachtProjectsInternational

ELITE SPORTS & PURE IONIC WATER™

PIW was developed in conjunction with Elite sports scientists and nutritionists. It provides a growing number of elite sports stars with the ultimate in hydration. We have been supplying since 2004 our great tasting Pure Ionic Water™. These include:

- International Top-level athletes.
- Championship winning English Premier League football teams. (Chelsea FC, Man City FC, Leicester City FC).
- international and premiership winning rugby clubs

They insist on Pure Ionic Water™ because it is proven to rehydrate the body faster than any other commercially available water. Our Elite Sports Director and ex Team GB Performance coach Paddy Mortimer would be happy to discuss any hydration issues and confirm the status Pure Ionic Water™ has in elite sports.

"Drinking it fresh from your faucet, Pure Ionic Water™ provides a powerful hydrogen anti-oxidant and it promotes optimum hydration performance due to its pure water enriched mineralisation" **P Mortimer.**

THESE ELITE SPORTS PARTNERS DRINK PURE IONIC WATER -

WET'S ELITE S TECHNOLOGY REMOVES ALL TRACES OF MICROPLASTICS FROM WATER

- Microplastics are so small that when ingested can get into our bloodstream.
- 93% of tested big brand, bottled waters contained microplastics so question your bottled water supply.
- Although MICROPLASTIC is found in both tap and bottled water, less microplastic is found in tap water than your famous brand bottled water BUT;
- NO sample tested across ANY OCEAN on the planet has been found without micro plastics present.
- Plastic can absorb chemicals and when ingested can be harmful to our bodies. You are effectively absorbing polluted oil. Unfortunately microplastic from the ocean is a major health hazard for ocean life and humans.
- Approximately 90,000 micro plastics have been found to be dispensed through the average shower where no prevention is taken on land or sea.

THE WATER SMART FOUNDATION IS COMMITTED TO PROVIDING SOLUTIONS AND EDUCATION TO PROTECT OUR NATURAL WATER SOURCE. WET SUPPORTS THE FOUNDATION AND EVERY SYSTEM SOLD ASSISTS WET IN CONTRIBUTING ITS TECHNOLOGY AND EQUIPMENT RESOURCES TO THE GLOBAL WATER CHALLENGES THE FOUNDATION FIGHTS.

THE ELITE PI 7 - FROM £11995.00

MODERN, ELEGANT, HIGH-TECH DESIGN, CONTEMPORARY FAUCET WITH 7 DISPENSING OPTIONS FOR YOUR GALLEY AND / OR PANTRY

Impressive design, exceptional build quality, high performance and high technology, perfect for integration within your galley units dispenser. 5 of the options are for Pure Ionic Water at room temperature, cold still, cold slightly sparkling, cold sparkling and hot (95°C with safety button), while 2 are for non Pure Ionic Water - cold and hot - direct from your tanks.

TOUCH SCREEN-

A flat, stylish control panel: stunning design and maximum practicality for easy cleaning and maximum hygiene. The absence of mechanical buttons, thanks to the touch-screen controls, makes for simple cleaning with a sponge!

UNRIVALLED VERSATILITY-

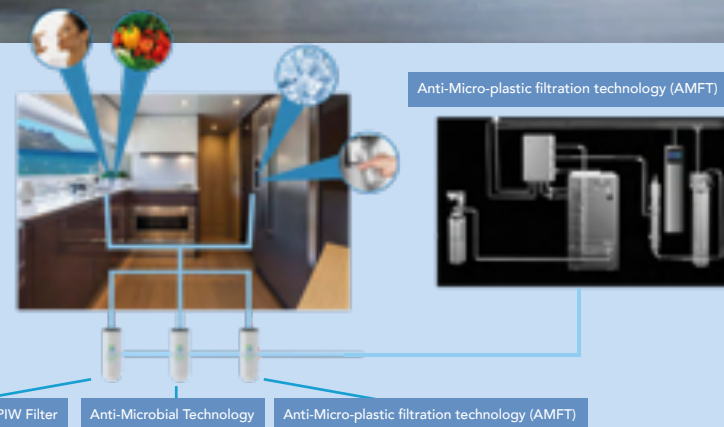

The bespoke faucet with its numerous dispensing options works as the dispensing system to the WET Marine Elite S Water system the total Elite system offers great versatility of different enriched Pure Ionic Water™ whilst protecting against microplastics other impurities and bacteria in the water.

ELITE PI 7

Dispensing a Superior, Alkaline and Energising great tasting Water that you can drink.

the perfect High Quality faucet range that can be used in your Home, Restaurant, Spa, Health and Wellness club, Hotels, Offices, as well of the Superyacht and Marine environment.

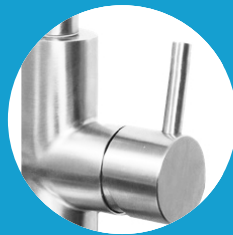

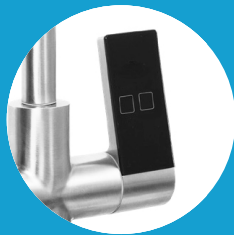

ELITE PI 7 FAUCET HYDRATION

ELITE PI 7 FAUCET HYDRATION (installation subject to site/schematic survey)

The luxury Elite PI7 Marine Faucet by WET Marine is the perfect choice for the private Galley or bar on yachts, super yachts and mega yachts.

This multi-functional product has been manufactured to the highest quality and finish, the fully automatic push button faucet dispenses award winning, super premium alkaline Pure Ionic Water. Included in this package is the PIW 3 Galley faucet and 10 glass engraved 750ml rewashable bottles.

galley tap but subject to site survey. The WET Marine
Elite S System.

SIZE -42.5 x10.7x40

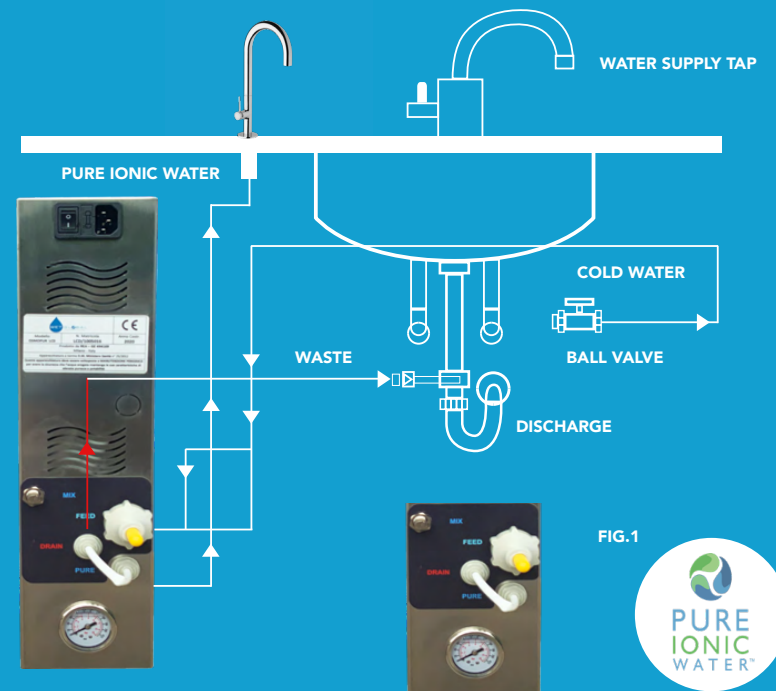

MARINE

THE WET MARINE ELITE S WATER SYSTEM the new most advanced ENHANCED FILTRATION OF WATER and the PIW 1 FAUCET.

The S stands for sport as the water that it produces Pure Ionic Water™ is the choice of Elite Sports.

The system based on the Natural Osmosis reverse principle but enhanced. Did you know that Seagulls use a natural osmosis reverse technique to eliminate things they don't want from the water they drink? They can remove dissolved salt, minerals, and other contaminants by filtering the water through a small membrane in their throats.

The WET MARINE ELITE S WATER SYSTEM and the PIW 1 FAUCET equipment is designed for professional use and is perfect for marine or home drinking water needs. It ensures high performances, it is designed to take up minimal undersink space.

SIZE -42.5 x10.7x40

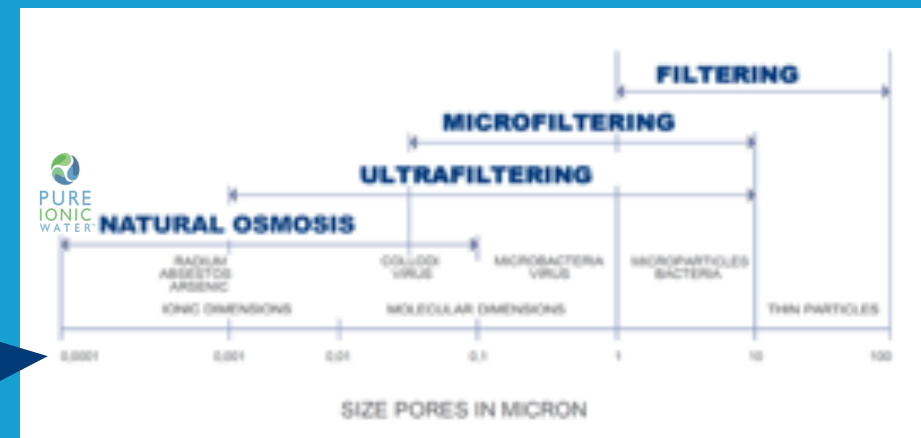

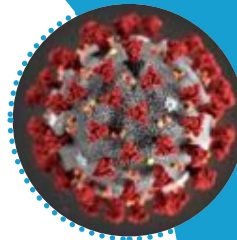

MARINE

THE WET ELITE S WATER SYSTEM PREVENTS CORONA VIRUS AND BACTERIA FROM CONTAMINATING THE DRINKING WATER.

The Natural Osmotic Membrane processing forces water through a semi-impermeable membrane to separate the melted foreign bodies, either organic or inorganic. The osmotic membranes have an infinitesimal pores dimension according to Angstrom scale ($1\text{\AA} = 1/1000.000.000$ meters).

That is why the Advanced Osmosis can be seen as a very strong filtering process. Actually it is not an ordinary filtering but an "orbit- al one". During the ordinary filtering the whole water solution is forced through a filtering mean and any kind of impurities not so small to pass through it, is kept or entrapped from the mean itself.

On the contrary the orbital filtering works through two different input streams: "concentrate", a stream containing rejected impurities that do not pass through the membranes and the "permeated" stream that is forced through the membranes.

MARINE

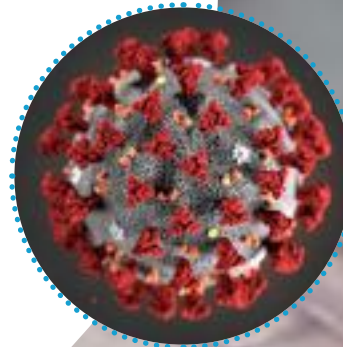

THE BENEFITS OF PURE IONIC WATER™

Pure Ionic Water™ is purified and enriched with minerals providing high levels of hydrogen antioxidants and a perfect "alkaline mineral" balance for health and hydration. These minerals, also known as electrolytes help regulate fluid balance, assist the performance of the nervous system, assist muscle recovery and support the health of joints & tendons. In summary they maintain the healthy function of your body and assist recovery from sports. WET MARINE views you and your crew as OCEAN ATHLETES.

(Check out "pureionicwater.com" for additional information on the fantastic benefits of our water) even the bottled water industry labelled it as the No.1 global functional water).

Natural mineral alkaline water that has a pH of 9 plus is inhospitable to Coronavirus. So not only are you getting the benefits from drinking Pure Ionic Water™ the scientific world believes it is the best pH of water to combat all Viruses.

The observed high pH optimum for coronavirus-induced syncytium formation is consistent with conformational changes in E2 (S) at a high pH playing an important role in virus penetration and cytopathogenicity.
(Sturman et al., 1990) J Virol. 1990 Jun;64(6):3042-50.

THE BENEFITS FOR YOUR YACHT ARE MANY, HERE ARE A FEW -

- Multi systems to suit your price point (Multi voltage).
- Multiple choice of possibly the worlds greatest tasting water from one tap;
- Ambient temperature PIR,
- Chilled PIR,
- Boiling PIR,
- Carbonated PIR,
- Semi Carbonated PIR,
- T off system to ice maker/fridge (optional)
- Hot and cold function direct from mains supply
- No Reason to rely on single use plastic bottles , no storage or weight issues, No more costly shopping for different water types.
- Small footprint for high quality build equipment.
- Bespoke Glass engraved re usable bottles for daily use for owners / guest areas etc.
- Bespoke optional wheat straw (not plastic) lightweight heavy durable crew cups which are easy to store. (Can be branded)

Historically on Marine vessels so far installed with the system. The total cost has been recovered within a year. That simple reason is because of no need, for single use plastic bottle purchases. As part of our commitment to the WSF, the WET Elite S Water System has an in-built single use plastic bottle count, this can be set and monitored. It would assist if you could link in on to the WSF site and register your annual bottle count saving. Thus enabling us all to support the WSF to potentially prevent (its target) 1 million single use plastic bottles from potentially contaminating our Oceans and Marine life.
