

Caribbean Data Plans

YachtProjects International

Caribbean Data Plans

No long term commitment - month to month contract.

- No admin fees or deposit.
- Flexible per GB tariff options.
- Pepwave SpeedFusion Specialist.

Our data plans allow usage in over 100 countries worldwide, however, they are primarily designed to be used in North America and the Caribbean.

We cover all the islands (except for the Bahamas and Cuba) in addition to the USA, Mexico and some of Central America (including Panama).

We believe the choice of 4G networks available with our plans to be unrivalled by any solution currently on the market.

Flexible Solution

We have simplified our larger data tariff to offer greater flexibility. There is no need to keep swapping plans when guests are on board and no expensive overage rates.

Our flexible plan offers the widest choice of 4G networks throughout the Caribbean

Tariff	Flexible Premium
Monthly Rental	£475.00 / \$625.00
Inclusive Data	100GB
Per GB Thereafter	£3.25 / \$4.25

By using two different SIMs simultaneously, our tariffs give access to the best 4G networks on all the supported islands. These includes Digicel and FLOW in the Commonwealth Caribbean and Orange Caraibe in the French Territories (Orange is by far the best network on these islands). For larger, multi SIM, routers such as the Pepwave HD Series, an additional pair of SIMs can be added to your plan for £150.00 / \$195.00 per connection. For example, with a Pepwave HD4 using all four modems, you would pay the monthly line rental outlined above plus 3 x £150.00/ \$195.00.

Small Vessel Plan

This is an affordable plan ideal for smaller vessels or low usage requirements. Plans are limited to two SIMs per vessel.

Tariff	Small Vessel 100
Monthly Rental	£350.00 / \$450.00
Inclusive Data	50GB
Per GB Thereafter	£10.00 / \$12.50

This plan has less flexibility and cannot be upgraded to our flexible plans mid-month and extra data cannot be added.

This plan uses a single SIM which means network choice is limited in French Territories.

The SIM does not automatically cut off once you have used your data package, but we can advise how to set this on your router.

Alerts

- Usage alerts will be sent at 50%, 75%, 90% and 100%.
- Spend alerts will also be sent at £250 and then again at £500, or the same values in USD
